Summary

I combine front-end development, design, and marketing expertise to create digital experiences that are both visually compelling and strategically effective. With a foundation in HTML, CSS, and JavaScript and strong skills in graphic design and brand storytelling, I bridge the gap between creative and technical roles. My background spans web development, freelance design, and communications projects, equipping me to adapt quickly, collaborate across teams, and deliver solutions that drive engagement and performance.

Core Skills

Front-End Development: HTML, CSS, JavaScript • Responsive & accessible UI design • SEO best practices • Analytics monitoring • Website performance optimization

Graphic Design & Branding: Logo & brand identity design • Adobe Photoshop & Express • Social media graphics • Digital/print design

Marketing & Communications: Content creation & copywriting • On-page & technical SEO • Email marketing & newsletters • Community engagement strategies
